RA use the same Harvest Price for soybean a CRC but November average for Corn.

² An Example Kansas Corn Claim. A Kansas Corn grower with a 110 bu/acre APH X 70% coverage X higher of harvest, plant price of \$2.59 would have had a revenue guarantee of \$274.04. If the grower produced 55 bu/acre, then based on today price of \$3.56 the revenue to count would be \$195.80 and the indemnity payment would be the difference between the revenue to count and the revenue guarantee for gross indemnity payment of \$78.24 (before premium deduction).
