¹ An Example Kansas Soybean Claim. A Kansas Soybean grower with a 50 bushels APH X 70% coverage X higher of harvest, plant price of \$6.18 would have had a revenue guarantee of \$216.30. If this grower produced 15 bushels, then based on today's price of \$5.93 the revenue to count would be \$88.95 and the indemnity payment would be the difference between the revenue to count and the revenue guarantee for gross indemnity payment of \$127.35 (before premium deduction).

² RA uses the same Harvest Prices for Soybeans as CRC but November average for Corn.
